Solution Architecture

Food pattern
is an important is an
important factor to prevent
dieseases and improve
lifestyle

AI based application
produces tailored data
about calories intake and
shares food suggestions accordingly.

using AI to analyse clinical data ,research publications and
professional guidelines could also help to inform decisions about
treatment

AI could reduce the cost and time involved in analysing scans
,potentially allowing more scans to be taken to better target
treatement

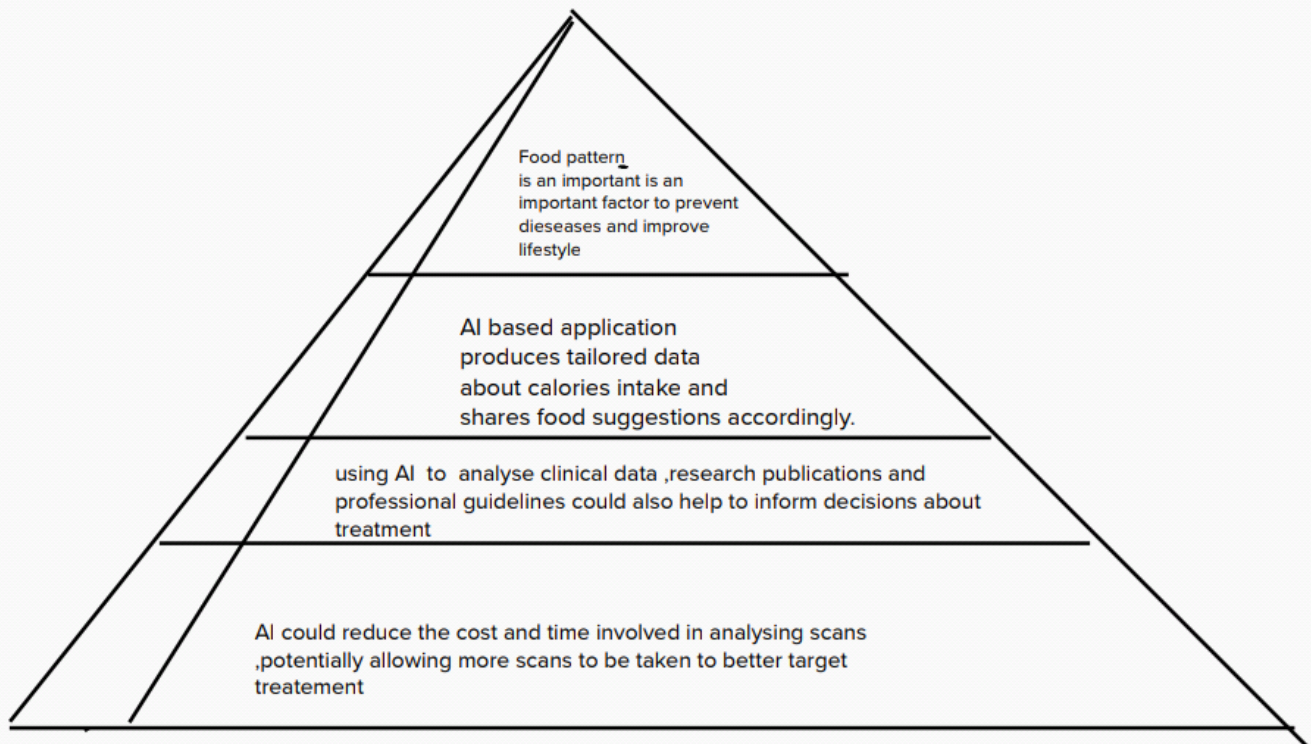

- carbohydrate
- calories
- fat
- colastral
- fibers
- vitamins
